"let's make it easy too"

If you have tried my
"Graph Concepts & Qns" playlist,
these Qns, will seem very easy.
Do try it once ;)

752. Open the Lock

Medium 3941 159 Add to List Share

You have a lock in front of you with 4 circular wheels. Each wheel has 10 slots: '0', '1', '2', '3', '4', '5', '6', '7', '8', '9'.

'8', '9'. The wheels can rotate freely and wrap around: for example we can turn '9' to be '0', or '0' to be '9'. Each move consists of turning one wheel one slot.

The lock initially starts at '0000', a string representing the state of the 4 wheels.

You are given a list of deadends dead ends, meaning if the lock displays any of these codes, the wheels of the lock will stop turning and you will be unable to open it.

Given a target representing the value of the wheels that will unlock the lock, return the minimum total number of turns required to open the lock, or -1 if it is impossible.

Example :- deadends = {"0201", "0101", "0102",
"1212", "2002"}

target = "0202"

Output = 6

"0 0 0 0"
✓ 0 1 0 0 ←
✓ 0 2 0 0 ←
✓ 0 2 1 0 ←
✓ 0 2 1 1 ←
✓ 0 2 1 2 ←
✓ 0 2 0 2 ←

Understand this Pattern

- ✓ word ladder ✓ (leetcode)
- ✓ Find all jumping numbers less than x ✓ (GFG)
- ✓ Open the lock ✓

Asks about number or word

OF
S

② Each digit or character can be changed.

③ You have to reach a target word/number in minimum moves.

④ List of words/numbers allowed/denied.
99

Why BFS?

"0000"

Graph.

nodes = state

0

BFS.

0

dead ends = { "0201", "0101", "0102",
"1212", "2002", "0000" }

" "
 cur = 0 0 0 0
 i⁰ ↑ ↑ ↑ ↑
 1 2 3

for (i = 0; i < 4; i++) {

ch = cur[i]; // '0'

inc = ch + 1; // '1'

cur[i] = inc; // "1000"

que.push(1000)
deadLine(1000);

dec = ch == '0' ? '9' : ch - 1;

cur[i] = dec; // "9000"

que.push(1000) ←
deadLine(1000); ←

cur[i] = ch;

```
int size = que.size();
```

```
while (size--)
```

```
}
```

```
level++;
```

```
}
```

standard
DFS

Time & Space:-

cost of dfs = 4

Wheels (w) = 4

$n = 10$

total combinations = n^w

Worst Case = $O(n^w)$

Space \rightarrow $O(n^w)$

$O(1)$ will be $O(1)$ for $(i=0; i < 4; i++)$

st.find \rightarrow $O(1)$
